

Mak Quick Shelter Informative Sheet

Taiyo Kogyo Corporation which produces large membrane structures and tent structures has made a decision to speed up the supply of negative pressure tents for medical use as a reaction to worldwide Coronavirus crises. We have a commitment to contribute to society by responding flexible and quickly to urgent requests in order to protect human health.

We would like to highlight some great advantages of this product:

- **Wide range of applications** is the main advantage. Mak Quick Shelter with normal specifications can later find another purpose and be used in a wide range of applications, such as for disasters and events, countermeasures against extreme heat, temporary facilities, children daycare facilities, advertising and other purposes.

- **Easy Set Up:** Mak Quick Shelter provides excellent functional spaces which can be set up in a short time of only about 10 minutes. Because of this characteristic, product was named “quick” shelter.
